

In my local town with listen to K-love from time to time and have heard it may be taken off with this new new broadcast service coming soon. I hope this is only rumor as K-love is a great station for our community and others. They have helped with support for events in our area, also they're music and messages are great for the community to hear. I have never heard a complaint from listeners of the station but only praise. If they were to be taken off the air I trully believe it would hurt many communities. So please consider these things as there are others that believe the same. Thank you for your time and any help you can give.

God Bless
Shea Clack
